

Milliken®

UltraFast™ Solutions

For improved productivity in polyethylene

Higher productivity | Improved quality | No change in dimensions

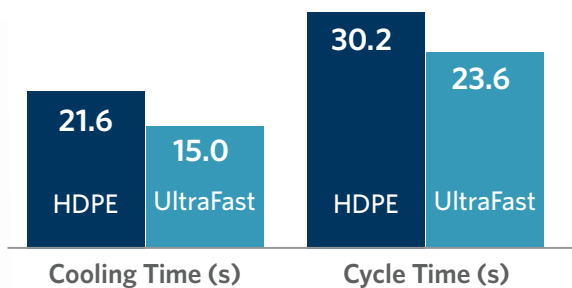

UltraFast Solutions concentrates (natural or combined with color) increase the crystallization rate when added to polyethylene.

This results in processing benefits, including reduced cooling and cycle times while maintaining key dimensional specifications.

Decreased cycle time with UltraFast Solutions means higher productivity (more parts) and the delay of high capital investments for capacity expansions while maintaining high quality parts.

20 Liter Pail

Typical applications

Injection Molding: Pails, lids, pallets, refuse carts, totes, bins, caulk tubes, pouch fitments, and caps & closures

Blow Molding: IBC's and jerry cans

For more information, please contact your Milliken technical representative.

Please contact your Milliken representative for further product information including chemical registrations, food contact status, and other regulatory details.

PLEASE NOTE: As each customer's use of our product may be different, information we provide, including without limitation, recommendations, test results, samples, care/labeling/processing instructions or marketing advice, is provided in good faith but without warranty and without accepting any responsibility/liability. Each customer must test and be responsible for its own specific use, further processing, labeling, marketing, etc. All sales are exclusively subject to our standard terms of sale posted at www.milliken.com/terms (all additional/different terms are rejected) unless explicitly agreed otherwise in a signed writing.
