GENERAL INFORMATION

Evergreen® Jade Turf Color Enhancer is a unique formulation designed to enhance turf color and quality. Improves turf appearance prior to tournaments and special events as well as helps to mask discoloration due to phytotoxicity of chemical applications, disease, and seasonal transitions. The unique formulation promotes uniform application accuracy of fungicides, herbicides, pesticides, liquid fertilizers, biostimulants and wetting agents.

DIRECTIONS FOR USE

Evergreen Jade Turf Color Enhancer should be added to the spray tank after all other chemicals. Mild agitation is required after the Evergreen Jade Turf Color Enhancer is added to the spray mix.

These application rates are provided as ranges because varying target vegetation conditions (i.e. type, color, height, density, etc.) and application methods / equipment (i.e. gallons/acre, nozzle type, boom, handgun, backpack, etc.) can impact the use rate. Initial applications should be made at the higher rate level, with appropriate adjustment for subsequent uses.

HEALTH HAZARD AND FIRST AID INFORMATION

Avoid contact with eyes and skin - may cause temporary irritation. In case of contact, flush eyes / skin with large amounts

of water. If irritation persists, seek prompt medical attention. Do not ingest. In case of ingestion, drink copious amounts of water and seek medical attention.

STORAGE AND DISPOSAL

Store in original and closed container. Do not reuse empty container. Protect product from freezing. If product freezes, warm to room temperature and agitate well before use.

Small spills can be washed away with water. Large spills should be contained and salvaged. Disposal must comply with local, state and federal regulations.

EVERGREEN JADE TURF COLOR ENHANCER

- Enhances turf color prior to special events, during seasonal transition, and after environmental and chemical stress.
- Improves turfgrass tolerance to environmental stress.
- Provides visual aid for improved spray application and uniform color coverage.
- Suitable for use in standardly used equipment.
- Tank Mix compatible with fungicides, herbicides, pesticides and liquid fertilizers.
